American Geriatrics Society Awards

WILLARD O. THOMPSON AWARD

This award is given to the member of the Society who has made distinguished contributions to the field of geriatric medicine. It is awarded annually and consists of a gold medal and an honorarium of $1,000.

MALFORD W. THEWLIS AWARD

This award is given to a member of the Society who has made outstanding contributions to the welfare of the Society. It is awarded annually and consists of a gold medal and an honorarium of $1,000.

EDWARD HENDERSON LECTURE AWARD

This award is given to a member of the Society who, by his research and published works in the field of life sciences relating to the aging of man, has made eminent and exceptional contributions to a better understanding of the problem of health care for the aging and aged. It is awarded annually and consists of a gold medal and an honorarium of $1,000. The recipient of this award will deliver a lecture on some subject in the field of Aging at the Annual Meeting coinciding with the presentation of the award.

EDWARD B. ALLEN AWARD

This award is given a member of the Society who has made important contributions to the field of geriatric psychiatry. It is awarded annually and consists of a gold medal and an honorarium of $1,000.

AMERICAN GERIATRICS SOCIETY FELLOWSHIPS IN GERIATRIC MEDICINE

Residents in any discipline in medicine are eligible to apply for these fellowships. The purpose is to encourage Residents to devote time and effort to some research project that hopefully will lead to a better understanding and improvement of the health status of the older patient. There are 3 fellowships in this category, each in the amount of $1,800 per annum.

AMERICAN GERIATRICS SOCIETY-LEDERLE SUPPLEMENTARY GRANTS

Through the generosity of Lederle Laboratories, the American Geriatrics Society sponsors 3 grants to Residents in the Amount of $1,800 each, payable in monthly installments for a period of one year. The purpose of these grants is to stimulate the interest of young physicians in improved medical care of the aging. Each successful applicant is required to submit a detailed report at the end of the grant period, which will be considered for publication in the *Journal of the American Geriatrics Society*.

AMERICAN GERIATRICS SOCIETY CONTINUATION GRANT

This grant is to be awarded annually at the discretion of the Board. The recipient is to be chosen from among the 3 winners of the American Geriatrics Society-Lederle Supplementary Grant for the previous year. The winner will be the Resident who submits the best report of his research during the year of his American Geriatrics Society-Lederle Grant. This Continuation Grant will be in the amount of $1,800 and is to be paid at the rate of $150 monthly beginning July 1 of each year.

EXCERPTA MEDICA MONOGRAPHS

H. Brieger and J. Teisinger

TOXICOLOGY OF CARBON DISULPHIDE

This monograph deals with the problems associated with the use of carbon disulphide in agriculture and some secondary industries, including those concerned with the production of artificial fibres. The recent work on action mechanisms and biotransformation of carbon disulphide in the human body makes this volume a valuable reference source for both specialists in industrial hygiene and toxicologists in general.

272 pages; Dfl. 46,80/$13,00 (post-paid)

R. Margaria

EXERCISE AT ALTITUDE

The controversy surrounding the holding of the 1968 Olympic Games in Mexico City, 2,300 meters above sea level, has revived interest in physiology at high altitude, particularly in relation to muscular performance. Based on papers presented at a Symposium of the Council of the International Union of Physiological Sciences, this monograph contains some of the most recent studies carried out on the effects of high altitude on living organisms.

CURRENT RESEARCH ON GROUP A STREPTOCOCCUS

Contains studies in depth on the composition of Group A streptococcus cell and the action of its components or extracellular products; immunity against Group A streptococcus; and the first extensive review of a relatively new field: the L-form of Group A streptococcus.

382 pages; Dfl. 90,00/$25,00 (post-paid)

L. Penning

FUNCTIONAL PATHOLOGY OF THE CERVICAL SPINE

The significance of mobility in the functional approach is clearly and authoritatively laid out in chapters on functional radiographic examination; functional anatomy; and the borderland of normal and pathological relationship of the cervical vertebrae. Principles of the functional approach are applied to congenital anomalies, spondylotic myelopathies, and injuries.

210 pages; Dfl. 48,60/$13,50 (post-paid)

M. F. Sullivan

GASTROINTESTINAL RADIATION INJURY

The first volume of Excerpta Medica's new series, Monographs on Nuclear Medicine and Biology, deals with current information on normal structure and function of the gastrointestinal tract and compares this information with changes resulting from radiation injury.

540 pages; Dfl. 118,80/$33,00 (post-paid)
